

I CLAIM:

1. A dart board cabinet comprising:
a cabinet body for supporting at least one dart board, and
at least one reference line generating device attached to said
5 cabinet body, to generate at least one reference line as a toe line.

2. The dart board cabinet as claimed in claim 1, wherein said at
least one reference line generating device includes a light
generating device for generating said at least one reference line.

3. The dart board cabinet as claimed in claim 2, wherein said at
10 least one reference line generating device includes a housing to
receive said light generating device.

4. The dart board cabinet as claimed in claim 3, wherein said at
least one reference line generating device includes a circuit board
received in said housing, and said light generating device is
15 attached to said circuit board.

5. The dart board cabinet as claimed in claim 3, wherein said
housing includes a casing having a bore formed therein to receive
said light generating device.

6. The dart board cabinet as claimed in claim 5, wherein said at
20 least one reference line generating device includes a lens received in
said casing and disposed in front of said light generating device.

7. The dart board cabinet as claimed in claim 6, wherein said
casing includes a passage formed therein and communicating with
said bore thereof to receive said lens therein.

25 8. The dart board cabinet as claimed in claim 1 further
comprising means for attaching said at least one reference line
generating device to said cabinet body.

9. The dart board cabinet as claimed in claim 8, wherein said attaching means includes at least one arm having a first end attached to said cabinet body, and a second end for supporting said at least one reference line generating device.

5 10. The dart board cabinet as claimed in claim 9, wherein said at least one arm includes an extension laterally extended from said first end of said at least one arm, and secured to said cabinet body with at least one fastener.

10
